Summary

Software Engineering undergraduate expertise in in full-stack web and mobile application development. Experienced in building scalable real-world systems using modern technologies including Next.js, React.js, Node.js, Flutter, and Python. Passionate about developing intelligent, user-centered software solutions with a strong focus on AI integration and modern software architecture. Actively engaged in academic and personal projects demonstrating strong problem-solving and software engineering best practices.

Education

BSc (Hons) in Software Engineering 2023 – Present

Sabaragamuwa University of Sri Lanka

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Web Development, Software Engineering, Design Patterns, Software Architecture, Operating Systems, Computer Networks.

G.C.E. Advanced Level – Physical Science 2019 – 2021

Galewela Central College

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, Java

Web Development: HTML, CSS, React.js, Next.js, Node.js, Express.js, Tailwind CSS

Mobile Development: Flutter (Cross-platform Mobile Applications)

Databases: MongoDB, MySQL

Tools & Technologies: Git, GitHub, Linux, AI Fundamentals, TensorFlow (Basic)

Projects

PathAI – AI-Powered Career Roadmap Architect [GitHub](#)

- **Technologies:** Next.js, TypeScript, FastAPI (Python), OpenAI API, Tailwind CSS
- Developed an intelligent platform that leverages Generative AI to analyze user skill sets and generate personalized professional roadmaps and learning paths.
- Engineered a high-performance backend with FastAPI to handle complex recommendation logic and optimized frontend responsiveness using Next.js.

WayGo – Smart Bus Tracking & E-Ticketing Mobile Application (Group Project) [GitHub](#)

- **Technologies:** Flutter, Dart, Node.js, MongoDB, Google Maps API, Socket.io, Firebase
- Developed a smart transport system with role-based dashboards for Admins, Drivers, and Passengers to streamline public transit operations.
- Implemented real-time bus tracking and digital ticketing using Google Maps API and Socket.io, along with admin analytics and fleet management.

MR Stores – Full-Stack Men's E-Commerce Web Application [GitHub](#)

- **Technologies:** React.js, Node.js, Express.js, MongoDB, JWT, Bcrypt.js, Tailwind CSS
- Built a modern full-stack e-commerce platform with responsive UI, secure authentication, and a scalable shopping cart system.
- Developed an Admin Dashboard for product management (CRUD) and real-time order tracking with efficient backend APIs.

MR Ride – Vehicle Rental Management System [GitHub](#)

- **Technologies:** React, Context API, Node.js, Express.js, MongoDB, Cloudinary API
- Engineered a vehicle booking ecosystem with real-time availability checks and a centralized Admin dashboard for fleet and rental cycle management.
- Implemented secure backend logic for booking verification and used Cloudinary API for optimized cloud-based image asset management.

Digital Food Ordering System (Group Project) [GitHub](#)

- **Technologies:** React, Node.js, Express.js, MongoDB, Stripe API, JWT
- Collaborated on building a digital marketplace with menu browsing, order tracking, and a full-featured Admin Panel to manage food items and customer orders.
- Integrated secure payment workflows and designed a responsive frontend to ensure a seamless ordering experience across all devices.

Awards & Certificates

- | | |
|--|------------------------------|
| ● Diploma in Computer Science – Visiontec International | Google Drive |
| ● Python for Beginners – University Of Moratuwa | Google Drive |
| ● Diploma in Graphic Design – Visiontec International | Google Drive |
| ● Diploma in Office with Graphic – Visiontec International | Google Drive |

Soft Skills

- Teamwork, Communication, Problem Solving, Time Management, Fast Learner, Adaptability

Languages

- English ● Sinhala ● Tamil
