Summary

Software Engineering undergraduate with hands-on experience in full-stack web and mobile application development, specializing in scalable, AI-integrated, and real-time systems. Skilled in Java, Python, Node.js, and TypeScript, alongside modern frameworks including React.js, Next.js, and React Native. Experienced in building secure RESTful APIs, managing enterprise-grade authentication flows, and integrating advanced AI capabilities. Familiar with fundamental cloud and DevOps technologies such as AWS, Docker, and Kubernetes. Passionate about solving complex engineering challenges through clean code and robust software architecture, eager to contribute and grow as a Software Engineering Intern.

Education

BSc (Hons) in Software Engineering

2023 – Present

Sabaragamuwa University of Sri Lanka

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems, Web Development, Software Design Patterns, Software Architecture, Human-Computer Interaction, Operating Systems, Computer Networks, Software Project Management.

G.C.E. Advanced Level – Physical Science

2019 – 2021

Galewela Central College

Technical Skills

Programming Languages: Java, Python, JavaScript, TypeScript, C++, C, Dart

Frontend Development: React.js, Next.js, Tailwind CSS, HTML, CSS

Backend Development: Node.js, Express.js, FastAPI

Mobile Development: React Native, Flutter

Databases: MongoDB, MySQL

Cloud & DevOps: Docker, AWS, Kubernetes, Vercel

Tools & Technologies: Git, GitHub, Android Studio, Postman, Linux, Firebase, WSO2 Asgardeo, OpenCV, Gemini API, JWT, Socket.io

Projects

PathAI – AI-Powered Career Roadmap Architect

[GitHub](#) | [Demo](#)

Next.js, TypeScript, FastAPI, Python, Gemini API, MongoDB

- Developed a full-stack career platform utilizing Next.js and FastAPI to extract data from PDF resumes and generate personalized, step-by-step learning roadmaps.
- Improved backend performance by implementing asynchronous document processing and secure API data validation.
- Integrated the Google Gemini API to build a real-time AI Interview Coach and mentoring chatbot that provides personalized career feedback.

Sabra Trails – Cross-Platform Adventure Navigation App

[GitHub](#) | [Demo](#)

React Native, TypeScript, Node.js, Express.js, MongoDB, WSO2 Asgardeo, Gemini API

- Designed a cross-platform mobile app to solve local eco-tourism challenges by mapping hidden trails, integrating Google Maps for live directions, and providing real-time weather alerts.
- Implemented secure user authentication and identity management integrating WSO2 Asgardeo (OIDC/PKCE Flow).
- Integrated a RAG-based Google Gemini AI assistant to provide context-aware, personalized hiking recommendations and safety guidance.

Tasto – AI-Powered Food Ordering & Management Platform

[GitHub](#) | [Demo](#)

React.js, Node.js, Express.js, MongoDB, Gemini AI API, JWT

- Developed a full-stack food ordering platform implementing secure JWT authentication, dynamic cart management, and a seamless order placement flow.
- Integrated a RAG-powered Gemini AI chat assistant to analyze the current menu and provide personalized food recommendations to users.
- Built an admin dashboard for menu management, order tracking, and automated PDF receipt generation.

Hybrid Student Attendance System (Ongoing University Community Project – Team Lead)

[GitHub](#)

React Native, Node.js, Express.js, MongoDB, Python (OpenCV)

- Leading a 5-member team to develop a secure attendance system utilizing QR codes, face recognition, and GPS geofencing.
- Developed the backend MVC architecture for the system's lecturer and settings modules, building RESTful APIs using Node.js and Express.
- Currently architecting the React Native client's core infrastructure, focusing on secure global API contexts, user authentication flows, and integrating the AI-based Face Recognition system.

WayGo – Smart Bus Tracking & E-Ticketing System (Group Project)

[GitHub](#) | [Demo](#)

Flutter, Dart, Node.js, Express.js, MongoDB, Socket.io

- Contributed to developing a comprehensive cross-platform mobile application featuring dedicated, role-based interfaces for Passengers, Drivers, and Administrators.
- Worked on integrating the Google Maps API and Socket.io to help facilitate the live bus tracking features.
- Collaborated on designing UI components for the e-ticketing system and driver dashboard, focusing on seat reservation and maintenance reporting screens.

Open Source Contributions

WSO2 Identity Server (wso2/docs-is) | Contributor

[View PR](#)

Contributed to the official project documentation by improving the clarity of the quick setup guide, successfully completing the GitHub review and merge process.

Awards & Certificates

- Diploma in Computer Science – Visiontec International
- Python for Beginners – University of Moratuwa
- Web Design for Beginners – University of Moratuwa
